NEW YORK, Nov. 28, 11 a. m .- The stock market was extremely dull this morning, except in Chicago Gas, which was weak. The opening prices were nearly all higher, ceipts, 2 cars. Hay, market strong. Rether gains over last night's figures extending to half per cent, but no life othy, \$1.50.69 per ton; fancy prairie, \$7.50; was seen in the transactions and prices were held at the opening \$46.5. figures for the greater portion of the hour when the weakness in Chicago Gas had the effect of forcing a few insignificant declines. The market closed dull and firm at insignificant changes from first prices.

Europe, the past week, has taken a comparatively limited part in the stock market, and on the whole sold as much as it bought. Some unfavorable comment is aroused by the obstinate firmness of exchange rates and the practical cessation of gold imports. The general tendency of the market has been in the direc-tion of improvement. It cannot be said that the bullishness is of an ag-gressive kind. In fact, the principal advances that were scored were in the stocks which had been sold heavily short by the bears and the upward movement would therefore seem to reflect the fears of the professionals rather than any influx of buying by the "street" or the public. At the same time the ease of money, with a steady increase in the investment demand for bonds, supplements the force of the targe traffic and earning returns which the railroads, almost without exception, are making, or of such significant occurrence as the declaration (after seven years' suspension) of a dividend on Eric preferred, encourages favorable anticipation.
